Bio

I am a college student/designer working in the area of film music and media studying AVMP. i have worked on projects and design for some local artist and brands in the baltimore area. I am currently working on music that i have been doing for a couple years and am learning the skills necessary for media production film and other ventures.

Experience

Music production-
i have worked on music and production for songs that i have made for myself and with some of my close friends and peers

Audio setup-
I have practice and skills setting up audio software and working with different stereo systems and midi audio devices and controllers

Set Design Assistance-
I worked and helped with art/music/show installations for artist in the Baltimore area to produce background set design for shows and performances

Photoshop and art-
I have created many pieces of art and collages within digital and physical media
Including spray painted canvases pencil and oil pastel work and some photoshop
Collage work

Sound engineering-
I have done some sound design and engineering for myself and my own work and music and also for some of my friends and their music and work
